PROFILE

Game Developer and Project Manager with 2+ years of commercial Unity experience delivering mobile and WebGL games. Combines hands-on development across gameplay, multiplayer, UI, platform migration, and service integration with client communication, requirements gathering, project planning, task scheduling, and coordination of small development teams.

SKILLS

DESIGN SKILLS

- Game Design Documents (GDD)
- Game Mechanics Design
- Systems Design
- Prototyping

TECHNICAL SKILLS

Engines: Unity, Unreal Engine 4 & 5

Programming: C#, C++, JavaScript, Python

Platforms: Android, iOS, WebGL, PC

Integrations: Firebase, REST APIs, Socket.IO, JSON

Unity tools: Addressables, Naninovel, Spine

SOFTWARE: Git, Visual Studio, Autodesk Maya

PROJECT DELIVERY: Requirements gathering, project planning, task scheduling, client communication, team coordination

PROFESSIONAL EXPERIENCE

Star Splash / Itchi Technology (HK) - Unity Game Developer

April 2024-Present

- Develop gameplay systems and interactive features in Unity using C# for commercial mobile and WebGL games.
- Design and implement responsive interfaces, player flows, localization, animation integration, and touch controls for phones, tablets, and browsers.
- Build real-time multiplayer functionality with Socket.IO, including room management, synchronized gameplay events, player state, scoring, and reconnect handling.
- Integrate Firebase authentication and data services, REST APIs, JSON data, Addressables, Naninovel, Spine, and external services.
- Migrate Unity projects between mobile and WebGL, replacing unsupported systems and resolving platform, dependency, browser, and build issues.
- Debug, test, stabilize, and optimize games released across Android, iOS, and WebGL.
- Lead client meetings, gather requirements, plan features and milestones, schedule work, and coordinate 2-3 developers while remaining hands-on with implementation.

EDUCATION

University of the West of England, Bristol

BSc (Hons), Game Technology - September 2020-May 2023

- Developed games and gained proficiency in C#, Python and C++.
- Created 3D environments and game assets with Autodesk Maya.
- Created multiple short games and various gameplay features.
- Participated in multiple game jam projects.
